Education

University of Connecticut in Storrs, CT (2017-2020)
Physics BA

Description of Study

In my physics classes I worked in a lab setting and used programs such as Microsoft Excel and Wolfram's Mathematica in order to analyse collected data. I also learned to find analytic and numerical solutions to a number of physical situations, both by hand and with a computer.

Experience

A/V Specialist at University of Connecticut Student Union (2017-2020)

Job Description

As an A/V Specialist I was responsible for working with customers to provide technical support during events held at the Student Union. This often involved installing equipment before the event started, testing and troubleshooting equipment to ensure no malfunctions occurred during the event, communicating to the customer how to best use each piece of equipment, and creating a written report of each event after its conclusion.

Skills

- Statistics with excel spreadsheets, including techniques for nonlinear data analysis and error calculation
- Proficiency with Microsoft Excel, Word, and PowerPoint
- Experience with inventory management, customer service, and technical troubleshooting
- Basic proficiency with HTML, CSS, JavaScript, and C
